Great! Can I have Valois reach out directly to Rick or should she be contacting someone else?

Subject: Request for Technical Support

Hi Karen: our UIC program (Valois) is looking for someone in your Unit (possibly Rick) to review a series of technical (i.e., hydro-geologic) documents associated with public comments we received on the Dewey Burdock uranium ISR draft permits and proposed aquifer exemption. This review would take up to two weeks of time over the next few months and help inform whether EPA will need to revisit and revise some of the monitoring well and other requirements we proposed in these permits.

Please let me know if Rick (or someone else) could provide us this support, even if it would be for less than the estimated time noted above. Valois is available to meet with your staff next week to go over the specifics, etc. of what needs to be done.

Thanks,

Douglas
